

## Take Control of Your Cybersecurity Compliance Governance.

- ✓ **ATTAIN.** Standards-based Certification
- ✓ **MAINTAIN.** Translate IT jargon to C-Suite Decisions
- ✓ **PROVE IT ANYTIME.** Just press "play"

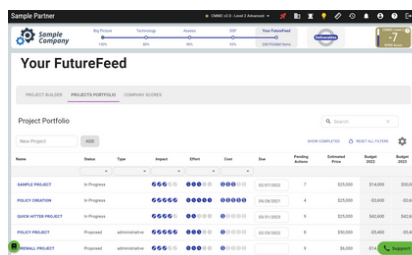

## Achieve and Prove CMMC / NIST 800-171 Compliance

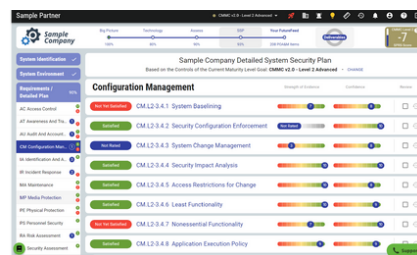

### More than Informed: Managed

FutureFeed's intuitive dashboard and powerful, automated presentation generation capabilities make it easy for you to manage your cyber program. Spot potential issues before they become problems. Ensure work is done on time and on budget.

### Enhanced Decision Making

FutureFeed's Project Builder puts key decision making criteria at your fingertips. Understand the impact, effort, and cost of each action item. Prioritize the actions and build a strategic plan that meets your financial and business needs. Attain standards-based certification.

### Prove It Anytime

You must always be ready to demonstrate compliance with cyber regulatory requirements. FutureFeed automates the creation and maintenance of the necessary documentation, and much more. The approach gives you justifiable confidence to defend your current cyber posture. **Anytime.**

*"I used to try to manage the compliance through spreadsheets and that was really painful and lacked clarity. After reviewing many software tools, I can honestly say you'd have to rip FutureFeed out of my cold dead hands. It has been an invaluable tool to assuring we are on the right track for our client's compliance."*

Leia Shilobod | CEO, InTech IT

# Expectations are maturing

## Here's what you need to know today.

Governments, Prime Contractors and other Clients are increasing pressure on vendors to implement strong cybersecurity programs.

Your company is at risk of losing valuable customers and contracts if you cannot demonstrate that your systems comply with industry standards like CMMC and NIST SP 171.

### Create a Gap Assessment

Quickly perform a gap assessment against the IT technology data you have on-hand. Input information with step-by-step, in-app guidance for all the controls, objectives, and other requirements relevant to your business.

### Required Reports - *Press Play Anytime*

Automatically generate and publish industry-leading compliance information, including Supplier Performance Risk System (SPRS) scores, Plans of Actions & Milestones (POA&Ms), System Security Plans (SSPs), and other reports.

### Improve Communication

Easily view and manage your current security posture regardless of your technical sophistication. Automatically translate IT information into C-suite decisions using FutureFeed's powerful on-demand presentation and project management capabilities.

### Build Projects and Budgets

Filter, prioritize and approve POA&Ms to create projects with striking ease. Automatically build and dynamically maintain IT budgets through, and after, the compliance process.

### Increase Collaboration

Cybersecurity is a team sport, and the entire team needs to collaborate. FutureFeed's subscription costs stay the same regardless of how much information, or how many users or documents, you add.

### Securely Store Your Data

All data, including policies, procedures, and other documentation, is securely stored in our AWS Gov Cloud. You have 24/7 access to everything you need to prove compliance at anytime.
