

The Fast, Simple CMMC Solution

Safeguarding Controlled Unclassified Information (CUI) doesn't have to be complicated. The Cuick Trac Managed Enclave (CTME) takes the guesswork out of compliance and streamlines the process so you can save valuable time and resources.

Compliance presents serious challenges for SMBs, including:

- High upfront costs and unpredictable long-term expenses
- Expensive assessments with Certified Third-Party Assessing Organizations (C3PAOs)
- Not enough time, staff, or expertise to manage compliance and documentation
- Uncertainty around what qualifies as CUI and how to secure it
- Complex, resource-intensive processes for securing CUI
- Long timelines for achieving compliance

Our Mission

The Cuick Trac Managed Enclave (CTME) empowers organizations that support our nation's defense, economy, and critical missions with a secure, turnkey enclave that simplifies compliance, protects Controlled Unclassified Information (CUI), and eliminates the burden of building, managing, and maintaining their own secure environment. Built to meet the requirements of NIST SP 800-171, DFARS 252.204-7012, and CMMC Level 2, CTME helps contractors stay compliant, audit-ready, and eligible for the contracts that matter most.

About Cuick Trac

Cuick Trac was founded in 2018 by Beryllium InfoSec, a Dallas-based cybersecurity firm. The same experts who built the platform continue to manage and operate it today, ensuring it remains secure, reliable, and aligned with evolving compliance standards. With over 100 years of combined experience in cybersecurity and compliance, the Cuick Trac team delivers practical, proven solutions that reduce the burden of compliance and protect what matters most.

What Sets Us Apart?

FedRAMP Moderate Equivalency

CTME is the only managed Enclave-as-a-Service meeting FedRAMP Moderate Equivalency, trusted in the DIB and GovCon sectors.

Cost-Effective

Save thousands, potentially more, on implementation and management with all-in, transparent costs, without increasing staff.

CMMC Level 2 Certified

Beryllium InfoSec used CTME to achieve CMMC Level 2 certification. It's a proven platform that goes beyond checklists to deliver real results.

Unmatched Expertise

CTME experts have a combined 100+ years of compliance & cybersecurity experience. Our elite team has participated in DIBCAC JVSA audits and trains C3PAO assessors.

Simple & Seamless

CTME includes more out-of-the-box features than any competitor, including file sharing, storage, SIEM, and more.

Dedicated Help Desk

Our expert support team is here to assist CTME users with technical support and assistance, ensuring smooth operations.

Speed

Accelerate your timeline. Your environment can be ready for user onboarding in as few as 15 business days.

Reduced Compliance Burden

We handle 82% of the 320 assessment objectives of NIST 800-171A, freeing up your responsibility and saving you time and money.

How the Cuick Trac Managed Enclave Minimizes Your Compliance Burden

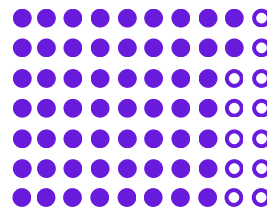

Compliance shouldn't drain your time or overwhelm your team. CTME takes on the heavy technical lift so you can stay focused on what you do best. We simplify the complex and handle key requirements for you, including:

- Providing Templates (Policy, Procedure, SSP)
- Ongoing Assessments
- Attestations
- SPRS Score
- Security Protocols
- Firewalls
- Multi-Factor Authentication
- SIEM (Security Information and Event Management)
- Creating Documentation
- Security Infrastructure Management
- Managing Azure VD & GCC-High environments
- Export Controlled Technical Information (ECTI) & ITAR/EAR Related Data

Cuick Trac's CRM

(Customer Responsibility Matrix)

We take on the majority of compliance objectives and clearly outline which ones are shared, with support available to guide you through them.
