snc DEFENSIBLE[™] SECURITY

For Defense By Defense

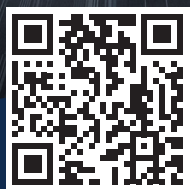

SNC Defensible Security is the defense-grade, cloud-based Security Operations Center as a Service (SOCaaS) tailored specifically for defense contractors, manufacturers and commercial organizations that have a defense focused business area. Our award-winning Security program is recognized by the U.S. government as being one of the top performing in industry. SNC recently achieved CMMC Level 2 based on its perfect High Confidence Assessment score of 110 from DoD's security assessors.

It is no longer a matter of if you will experience a cyber-attack, but when.

Contractors and manufacturers working within the defense industry are heavily targeted for what they have and what they know. Are you prepared to detect and protect against cyber criminals, sophisticated ransomware, targeted phishing, supply-chain attacks, and insider threats? Combine that with stringent compliance and regulatory requirements to work within the defense industry and you need a trusted partner in this fight – someone who understands these challenges because they live them every day.

The same team that protects SNC can now protect you.

- 24/7 Threat Monitoring & Response
- Turnkey, Cloud-based Solution
- Hunt + Detect + Respond
- Trusted access to national security info
- Scalable Protection
- Rapid Deployment
- CMMC Level 2, NIST, & Zero Trust Aligned

\$9.44M

Average cost of a data breach in the United States.

\$600B

USG Estimate for Intellectual Property Loss to China. Defense Contractors and Manufacturers are on the front lines of an ever-increasing cyber war.

\$16.2M

Average cost of an Insider Threat. Insider Threat Incidents have risen 40% over the past four years.

\$4.5M

Average cost of a ransomware attack. Ransomware grew 41% in the last year and took 49 days longer than average to identify and contain.

**277
DAYS**

In 2022 it took an average of 277 days or 9 months, to identify and contain a breach. 83% of companies experiencing a breach had been hit more than once. Cyber-attacks are also increasing

FASTER

Defensible Security shortens this window from months to hours, greatly limiting the impact of a breach. Bottom line: rapid detection and response enables faster recovery and less cost

LESSON: Time is money & it pays to be proactive.
